

# Innovation Projects 5A EIS – PX505 – 2023-2024

Responsible: Ionela PRODAN

August 2023

1. **AI4RFID:** Artificial Intelligence for better RFID localization
2. **NavigateT:** TurtleBot platform for navigation in an unknown environment
3. **IT HAND:** Design one or several autonomous systems based on data collection from a patient
4. **GO1Mapping:** Area mapping using GO1 quadrupedal robot
5. **LEctenna:** RF energy harvesting system
6. **FlyBOLT:** Embed the BOLT flight controller within a medium-size drone
7. **MultiDrones:** Coordination of multiple drones using Qualisys Track Manager
8. **MapRF:** UHF RFID Mapping and Localization
9. **EMFI:** ElectroMagnetic Fault Injection for attacking 32-bit microcontrollers
10. **CSAW'24:** Embedded Security Challenge
11. **SmartBuilding:** Smart Building management platform based on VOLTRON
12. **EdgeAI4RFID:** The classification between crossing tags and non-crossing tags (which can be possibly moved inside the environment)
13. **ClockG:** Clock glitch injection for attacking 32-bit RISC-V controller
14. **UpgradeTC:** CubeSat payload software upgrade telecommand
15. **PCBdesign:** PCB Design for Real Time Data Acquisition
