Esisar's expertise in cybersecurity

Our school graduates every year more than a hundred engineers in 4 specialties :

- **S**ecure Information Systems (SIS)
- **S**ecure Embedded Systems (SES)
- **E**MBEDDED Communicating Electronics (ECE)
- **E**MBEDDED Control Systems (ECS)

LCIS and Esynov expertise

A research team at the **LCIS (Systems Design and Integration Laboratory)** of Grenoble Inp - Esisar is dedicated to the safety and security of embedded systems. Many Ph.D theses are in progress in cooperation with major industrial companies and prestigious academic institutions.

The technology platform Esynov, whose expertise includes both the cybersecurity of embedded systems and information technology, provides companies with technical facilities (cybersecurity demonstrators, hardware security audit tools), training, support and research.

Why become a partner? CSAW'24

- Support a world-class event
- Identify trends and state of the art in cybersecurity
- Meet and exchange with cybersecurity talents from the European ecosystem
- Connect with CSAW finalists and future Esisar graduates
- Present your news and expertise during sessions dedicated to your company
- Exhibit your know-how during the forum

🌟 CSAW EUROPE AN UNFORGETTABLE EVENT 🌟

CSAW Europe in 2023 brought together nearly 700 participants at Grenoble INP - Esisar (finalists, industrialists, volunteers, visitors): numerous workshops and conferences were co-organized with economic and institutional players.
